# Future generation UV protection material encapsulated by Silk component.

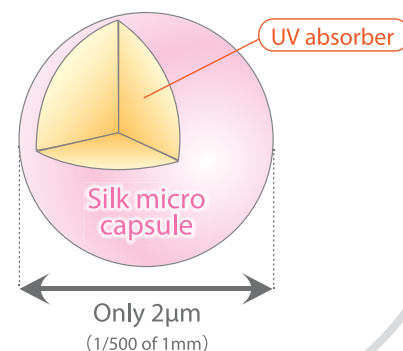

## The world's first technology

Developed a new capsulation technology  
by Silk component\*.

This technology becomes  
a new world standard  
as UV protection material!

\*SEIWA patent technology

Structure of Silasoma

## Why not start to protect your hair against ultraviolet rays just like skin?

Is it only skin that damaged by ultraviolet rays?

Have you ever felt that  
"the luster of hair getting weak", "the tip of hair getting dry",  
or "the color of dyed hair getting easy to fade out"  
when sunlight is strong?

It's because the ultraviolet rays from the sun relentlessly  
damage exposed and vulnerable hair.

### Protect hair from ultraviolet rays.

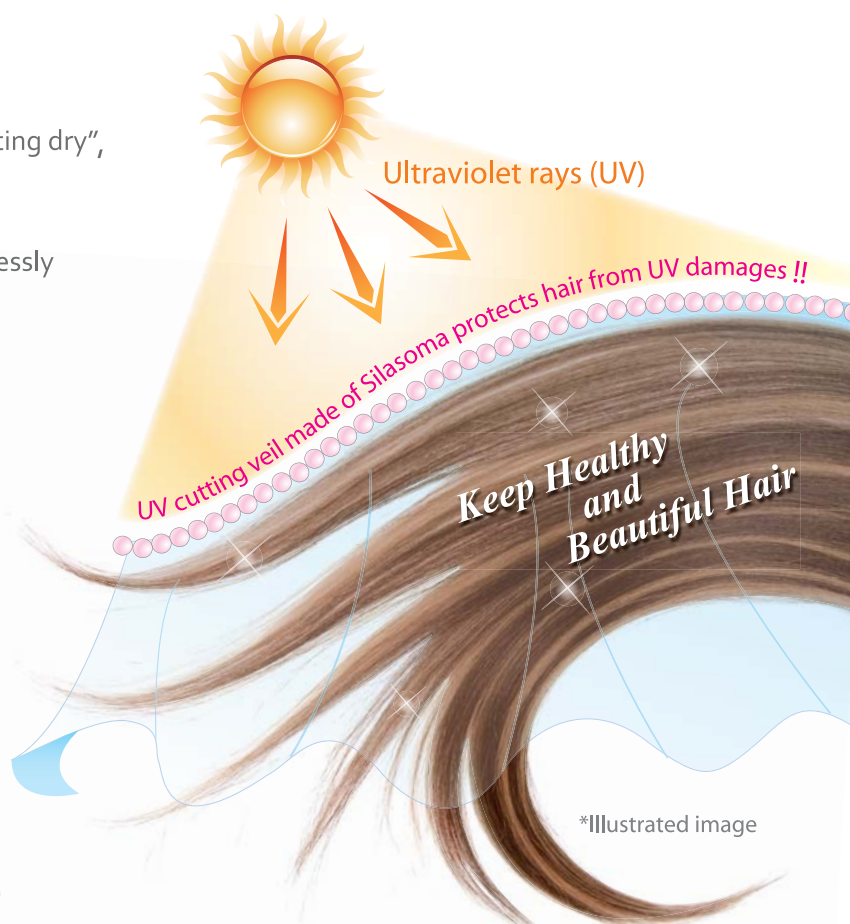

It's one of the most important things to keep your  
hair beautiful even easy to overlook.

Sometimes UV absorber presents oily bad feelings.  
Although **Silasoma** significantly cuts ultraviolet  
rays as well as UV absorber,  
it presents silky and light feelings.

Using hair care cosmetics containing **Silasoma**  
makes it possible to keep healthy and beautiful hair  
through daily hair care easily.

Mild for scalp is also advanced by trapping  
UV absorbers in capsules.

Don't you start the "Hair-sun-care" ?  
And become more and more beautiful!!
